

The Sensory Connection Program: Development and Implementation

Karen M. Moore, OTR/L 2 hr. Web Conference Proposal

The following outline is merely a suggestion for the flow of a web conference focused on background information and recommendations for integrating the Sensory Connection Program into your facility or unit. A copy of the Sensory Connection Program Manual and Handbook will be required for this presentation. Whenever it is appropriate, sections will be followed by discussion breaks and time for questions.

- ❖ Section 1: Program Overview and Objectives.
- ❖ Section 2: Program Group and Individual Treatment Components: Using activities, games, and worksheets
- ❖ Section 3: Environmental Support Component
- ❖ Section 4: Where do you begin? How does this program fit in to your treatment program?
- ❖ Section 5: Discussion of Goals and Wrap-up.

Coping, Calming, and Comfort Room Development: Environments for Self-Regulation and Sensory Exploration

Karen M. Moore, OTR/L 2 hr. Web Conference Proposal

The following outline is merely a suggestion for the flow of a web conference on CCC Room Development; it will be revised according to the needs of your facility. Whenever it is appropriate, sections will be followed by discussion breaks and time for questions.

- ❖ Section 1: Background information as well as descriptions and pictures of various kinds of CCC rooms and the different ways people are using them. Discussion of successful and unsuccessful strategies.
- ❖ Section 2: How will your facility benefit from a CCC Room? What challenges will you face?
- ❖ Section 3: Equipping the CCC Room - Exploration of various equipment and storage ideas. Questions and sharing of ideas afterward.
- ❖ Section 4: Rules, protocols, and data collection.
- ❖ Section 5: Discussion of goals and wrap-up.

Restraint Reduction/Trauma Informed Care Proposal: Moving from Being Cared for to Care of the Self

Karen M. Moore, OTR/L 2 - 3 hr. Web Conference Proposal

The following outline is merely a suggestion for the flow of a web conference on Restraint and Seclusion Reduction and Trauma Informed Care. It will be revised according to the needs of your facility. Whenever it is appropriate, sections will be followed by discussion breaks and time for questions.

- ❖ Section 1 Rethinking Restraints and Seclusion and The Sensory Connection to Trauma Informed Care
- ❖ Section 2: Safety Tools, Safety Plan Development, Self-Regulation Strategies - Shifting the Responsibility of Control to the Patient
- ❖ Section 3: How will you begin to implement this program for your Unit or Facility? What challenges do you expect?
- ❖ Discussion of goals and wrap up.
